# Formatting Removable Hard Drive Data Pack after Download of Video Files Using TSS Finder

Insert the data pack into the TW4 Docking Station and turn on the Docking Station. Connect the laptop to the TW4 Docking Station via the Ethernet cat5 cable to the 5 port switch. Downloading the video files of the removable data pack while inserted into the Docking Station is the same procedure as described in the "Downloading Video Files to Laptop" instructions. *Note-If the data pack will not be used in the same vehicle that it was removed from you must format the hard drives prior to installing in a different vehicle to allow the maximum recording time available.*
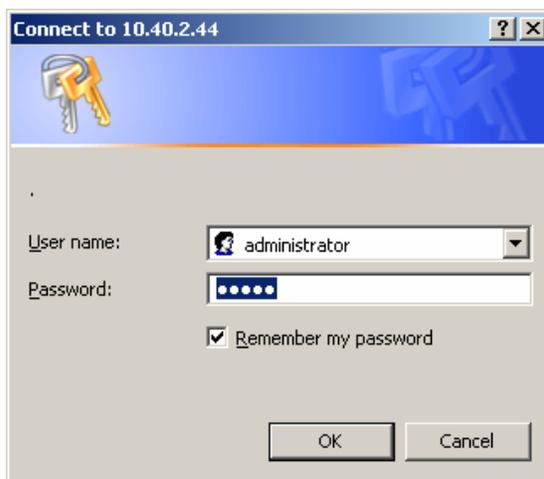

1. From the desktop of the laptop double click on the "TSS Finder" program, the following window will appear. It shows the recorders' that you are connected to.

Highlight the name and IP address for the docking station for the recording engine Example "PlayB-1-" & 192.168.1.11"

Note after formatting the first recording engine HDD you will need to format the second recording engine HDD. Example "PlayB-2- & 192.168.1.21"
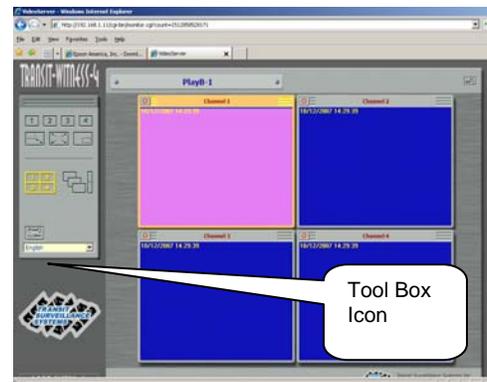

2. Double click on the Railcar #/name to open the program security page.

User name: administrator
Password: admin
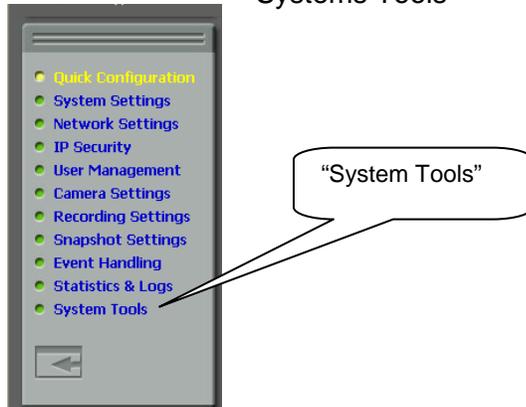

If it is already filled out click ok.

3. The program will launch the following window. No cameras will be displayed in the live video windows. Blue & pink screens indicate there are no cameras connected to the recording engine.

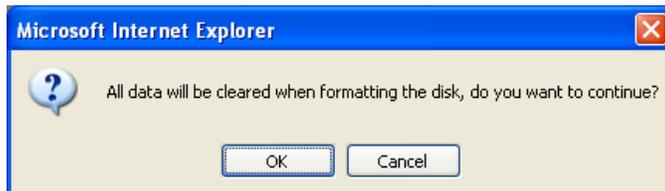

Tool Box Icon

4. Click on Tool Box icon

5. Use this window to select what operation you want to perform, Double click "Systems Tools"

System Tools

"System Tools"

7. After selecting "System Tools" the following window appears allowing the formatting of engine 1 hard drive, select "Disk Tools" select "Format Disk".

41234-1-

System Tools

System Update	Backup / Restore	Restart / Shutdown	Hardware	Disk Tools	Customized Settings

Current disk status : **Ready**

Available disk space : **939.29 MB.**

Disk Mode : Single Disk   Save

Format disk : Start   Stop

Check disk : Start   Stop

You will see the following warning- Select OK.

Microsoft Internet Explorer

All data will be cleared when formatting the disk, do you want to continue?

OK   Cancel

The following window will say "Formatting disk":

Formatting will take approximately 2 minutes to complete depending on HDD size.

The disk "Ready" will be displayed when completed (Note-if you get a "disk error" message reselect the "Format disk" start button again), this is normal and should reformat the drive.

When formatting is complete click on the back arrow to exit.

Repeat steps 2-7 above for record engine 2 hard drive.
